

Commissions Workflow: Understand Your Commission Structure

The Problem

Staffing firms are stuck managing commissions in error-prone spreadsheets and inconsistent logic buried in siloed systems. Finance teams waste hours reconciling payouts, recruiters lack transparency, and comp plans are impossible to scale.

Our Solution: Custom Commission Automation Built for Staffing

We deliver a purpose-built commission automation engine that integrates seamlessly with Bullhorn and payroll systems, replacing manual work with scalable, auditable logic.

What It Does

Automates complex commission calculations across roles, tiers, clients, and overrides

Provides recruiters and sales reps with transparent visibility into their payouts

Replaces Excel workflows with centralized, effective-dated logic

Eliminates time spent pulling reports or chasing down bonus logic

Tracks real-time gross profit, burdens, and performance thresholds

Enables a payroll platform ready export

POWERED BY

a Proven Tech Stack

Component	Purpose
API	Source for placements, time, users, and pay/bill data
Microsoft Fabric	Central data engine for applying rules and building outputs
SharePoint	Stores tier tables, overrides, burdens, and plan logic (effective-dated)
Power BI	Dashboards for recruiters, account managers, finance, and executives
Payroll Platform	Receives final payout-ready data by individual

WHAT'S INCLUDED

- Custom ingestion and automation of pay + bill data
- Logic build for standard and non-standard commission tiers
- Support for multi-role splits, burdens by state, and client-specific exceptions
- Weekly, bi-weekly, monthly, or custom data refreshes
- Full transparency or secure access recruiter/rep visibility (Power BI)

RESULTS YOU CAN

Expect 's Included

80%+ less time spent managing commissions

Reduction of payout disputes

Accurate, audit-ready historical tracking

Scalable logic that grows with your business
